

# Reciprocating Saw Blades - Metal Cutting - Bi-Metal 280mm

Bi-Metal Reciprocating Saw Blades are suitable for non-ferrous metals. The bi-metal blade is the combination of both a high carbon steel (HCS) body and a high speed steel (HSS) cutting edge. Giving strength and flexibility at both low and high temperatures. A tough shatter resistant blade that keeps its edge longer. Extended service life leads to greater cost effectiveness per blade. Milled & wavy set (MWS) teeth give a fine, straight cut.

## PRODUCT SPECIFICATIONS

<b>Cut Type</b>	Straight
<b>Teeth Type</b>	Milled & Wavy Set (MWS)
<b>Pack Type</b>	Pack
<b>T.P.I</b>	10
<b>Cutting Capacity (mm)</b>	3.0 - 12.0
<b>Substrates</b>	Non-Ferrous Metals
<b>Total L (mm)</b>	280
<b>Teeth Pitch (mm)</b>	2.5
<b>Pack Qty</b>	5
<b>Working L (mm)</b>	255
